RSNA 2025
Checklist
Questions To Ask When Evaluating Vendors

Reporting Solutions

How does the solution utilize DICOM data?

How is AI used beyond simple auto impressions?

Is the solution live in production today, and can I speak with with current users?

PACS Solutions

Is your solution truly cloud-native, or is it dependent on on-premises infrastructure?

How quickly can new features be deployed to production environments?

Can radiologists read securely from anywhere, without VPN or hardware dependencies?

How does your PACS integrate with reporting, AI, and workflow systems?

Business Continuity Solutions

How does your solution maintain access to images and reports during a PACS outage?

Does the platform offer seamless failover without user intervention?

Is the solution redundant and automated?

What uptime SLAs are guaranteed?

Worklist Solutions

Does the worklist unify PACS and reporting solutions across all sites?

Does your patient jacket automatically display summaries of prior studies?

How easily can your platform adapt to practice operations or technology changes?

Assessing Imaging AI and Foundation Models

Is your AI natively integrated into the reporting or reading workflow, or does it require separate logins, widgets, or viewers?

How does your AI connect findings directly to the radiology report?

Are results context-aware?

Can your AI insights drive automation in report creation?
